

The Promatch® parts program is partnered with Stryten Energy to offer a full line of Stryten Energy batteries and chargers. Stryten Energy is a global leader in motive power battery and charger systems for electric forklifts and other material handling equipment. In addition to a broad product offering, Stryten Energy's network of representatives offers comprehensive support and product expertise. Local service facilities let you work with people you know and trust.

Program Highlights

Assistance and Support

Count on your local Stryten Energy representative, Mitsubishi Logisnext Americas Inc., Promatch®, and Stryten Energy to help you manage a successful industrial battery program.

Broad Selection

Stryten Energy offers the broadest range of batteries and chargers.

Environmentally Conscious

Stryten Energy is the largest lead recycler in North America providing Logisnext dealers and their customers with the assurance of an industry leading battery management program.

Exclusive Brands

Stryten Energy is the exclusive supplier of Jungheinrich branded batteries. No one has more experience in powering Jungheinrich forklifts.

Fleet Services Capabilities

Stryten Energy offers services and systems that enhance forklift performance, fleet utilization and reduce risk of loss of power problems.

Industry Experience

No one sells more tubular batteries worldwide than Stryten Energy.

Ordering and Billing

All industrial battery transactions, including pricing and quoting are handled at the local level through your Stryten Energy representative. Billing is handled by Logisnext and Promatch. If you have been buying direct from a Stryten Energy representative, new purchases will now go through the Promatch parts program with no additional costs.

Product Delivery

With Stryten Energy's "Quick Ship" Program, 70% of orders are shipped within 48 hours.

What's In It For You

Achieve Promatch Forecast

All battery and charger purchases count toward Promatch forecast.

Continued Product Support

Local service facilities, market-based pricing, and technical support after the sale are available.

Earn Promotional Opportunities

Purchases count toward any Stryten Energy promotions (i.e. - Great Escapes).

Increase Market Share

Purchases increase your market share (dollars/truck) which is a critical element for Dealer of the Year (DOTY) and Quest for Excellence Performance System (QEPS) ratings. Purchases also impact the size of your "Competitive Edge" war chest.

Increase Parts Return Dollars

Since parts returns are allotted on gross purchases, higher dollar battery purchases raise the potential parts return dollars you can utilize for dead service parts inventory and other non-moving parts purchased from Promatch.

Our Commitment To You

It's all part of our commitment to help your business grow and achieve success.

Stryten Energy Battery Program

Placing Your Order

1. Contact your local authorized Stryten Energy representative. If you do not know your local representative, refer to the representative list ([see the following pages](#)).
2. Obtain a quote for industrial batteries and chargers from your local Stryten Energy representative.
3. Submit a purchase order to your local Stryten Energy representative. Do not submit purchase orders to Promatch.
4. To ensure the correct branch is billed and receives proper Promatch sales credit please follow the steps below when completing your purchase order:
 - Address the purchase order to: Promatch c/o Stryten Energy.
 - Reference the Logisnext dealer branch code to be billed.
 - Include the address of your local Stryten Energy representative.
 - Provide a unique PO number from your business system.

ABC Forklifts 1254 Lift Lane Grand Rapids, MI 49544 616.555.2365	PURCHASE ORDER DATE: 02/02/23 ★ P.O. # 123548
BILL TO:	
★ 58610 (Branch Code)	
VENDOR:	
★ Promatch c/o Stryten Energy	
★ Alpine Power Systems (Local Stryten Energy Rep.) 5304 Clay Ave. SW Wyoming, MI 49548	

Order Processing

1. Once your order is placed, Stryten Energy will validate the order as being part of the program. Validated orders are transferred to Promatch electronically.
2. Promatch and Stryten Energy will handle the transaction on behalf of the local parties.
3. You will receive an order acknowledgement from Stryten Energy which will include products ordered, quantity, and price.
4. Upon receipt of the product at your dealership, Promatch will bill your dealership at the locally agreed upon price and reference the original PO number submitted with your order.
5. The transaction will be included on your monthly Logisnext statement.

Additional Information

Contact the Promatch marketing department or your territory manager.

Contact your local Stryten Energy representative.

Stryten Energy Contact Information: Please refer to the Stryten Energy representative list (see the following pages).

MOTIVE POWER BATTERY LINEUP

Stryten Energy provides a variety of solutions for your energy storage needs, including flat plate, tubular, and lithium technologies. Stryten batteries are primarily used in forklift trucks, railroad and military applications.

LITHIUM-ION

M-Series Li510 lithium-ion batteries deliver faster charging, greater efficiency, and increased cycle life, all in a maintenance-free package. Featuring a dual cable system for convenient charging and integrated BMS (Battery Management System) which offers convenience and battery monitoring while providing a more powerful and cost-effective solution for your business.

TUBULAR

M-Series T330 batteries deliver more power in the same size container, with up to 18% more capacity*. These batteries are designed for opportunity and fast charging applications. T330 batteries also feature Stryten's round tubular technology, which provides longer run times versus competitive square grid designs.

The M-Series T310 family of tubular batteries provides the benefit of 90 day watering cycles through an innovative plate design that provides more than 70% more electrolyte headspace. The T310 is ideal for opportunity charge applications.

M-Series T300 batteries deliver premium cost-efficient power and are more durable and dependable than traditional flat-plate designs. T300 batteries are ideal for everyday conventional use and are ideal for opportunity charging operations.

FLAT-PLATE

M-Series F110 batteries deliver premium, cost-efficient power and extended durability to get the job done. The improved performance and extended cycle life of the F110 will boost your medium to heavy-duty trucks' run time. The F110 has been designed for use in opportunity charge applications.

M-Series F100 family is made up of economical flooded flat-plate batteries that have been designed to deliver consistent and reliable power for light to medium duty applications. F100 batteries are optimized for use in conventional charging.

M-Series AGM200 valve-regulated lead-acid batteries never need watering and are designed for light retail and medium warehouse material handling applications.

*versus conventional flooded batteries

CHARGER SYSTEM OFFERINGS

BATTERIES WITH ONBOARD CHARGERS

M-Series AGM220

AGM220 is an integrated valve-regulated lead acid battery and charging system designed for 24 volt electric walkie pallet trucks with loading capacities of up to 4,500 pounds. AGM220 houses a “smart” HF charger complete with auto stop/start capabilities and four 6-volt AGM200 bloc batteries.

OPPORTUNITY AND FAST CHARGING APPLICATIONS

Stryten’s family of multi-use chargers is designed with the latest technology for application in opportunity and fast charging environments. These applications require real-time monitoring of the battery temperature and other parameters.

M-Series X-3 and X-7

The M-Series family of modular multi-voltage opportunity chargers is designed for industrial battery fleet applications. They are ready to charge almost any motive battery, including Stryten’s Li510 lithium-ion. X-3 and X-7 chargers use the latest Silicon Carbide MOSFET (Metal Oxide Semiconductor Field-Effect Transistor) power technology to provide efficient high frequency power conversion to minimize infrastructure costs, reduce your carbon footprint, and provide multi shift opportunity and fast charging capabilities. All X-3 and X-7 chargers are available CEC-certified.

EHI Product Family

This family offers the latest in software-programmable customized battery charging profiles. Temperature from the battery is transmitted to the charger as data over power line to automatically adjust to the shortest and optimal charging profile. Data stored in the charger’s memory can be downloaded wirelessly to a management application on PC.

CONVENTIONAL CHARGING APPLICATIONS

Industrial chargers used for light-duty to heavy-duty applications are available in a wide range of options. These chargers are designed for applications that typically have more than one battery per truck and where batteries are exchanged at the end of each work shift.

EHF and EHY Product Family

These chargers are 100% rated, eight-hour recharge, high frequency devices that deliver multi-profile and multi-chemistry performance for battery types including flooded, flat-plate, or tubular. The newest EHF and EHY models are fully CEC-approved and offer energy-saving charging for multiple line voltages mostly found in smaller facilities.

Scan this QR code with your phone’s camera for additional product information and documents including brochures, installation and operation manuals, warranties and safety documents.
